- Customer Relations Management

SA Intl. Products

With exclusive Partnership with RemoteFreedom, SA Intl. offers products that help customers reduce their total cost of ownership. Our tools help customers to manage their end-user processing and infrastructure management needs.

- **RF Smart Thin Client**
Our thin client provides an intelligent yet flexible end-user computing device that is portable and secured.
- **RF Gateway**
The RF Gateway product is an intelligent tool with built in secured integration to all RF services.
- **RF Systems Monitor**
RF Systems monitor is the tool that is tied to all application services. It monitors the systems resources (including transactions) and alerts support teams in real-time.

The Company

SA Intl. is a company that is dedicated to providing innovative solutions in the area of information technology. We meet our clients' business challenges/objectives by ensuring that the right solution set has been selected to meet the ever expanding business needs of our clients.

Our primary goal is to focus on technology needs so that our clients can focus on their core business objectives. Our experience ranges from supporting and building the business case to providing & executing innovative technology solutions SA Intl solution consultants are experienced business analysts as well as technical architects that understand the industry in which they are serving. Our approach is to provide a solution set that offers flexibility & scalability for years to come.

Services

SA Intl. provides a wide variety of Information Technology and Management services with service level agreements that are comparable to that of large enterprises. The need for reduction in 'total cost of ownership' has helped us to envision an architecture service solution that caters to all sizes of businesses at a competitive rate. Our services are in line with the needs of our customers. They offer an end-to-end service that includes end user device (smart client), software, licensed management, data center support, access & authorization controls and network connectivity.

SA Intl. also offers commoditized IT services to the consumer segment. These services offer customers with an option to select the specific applications that meet their individual needs. Consumers can also purchase our smart client device at a fraction of the home PC cost.
